PROFESSIONAL SUMMARY

CPA and Salesforce-certified Data Architect with 10+ years building accounting infrastructure from zero to one at high-growth SaaS startups, including an M&A exit to Google. Specialist in ASC 606 revenue recognition, audit-ready close, and the upstream data architecture that makes finance trustworthy. AI-native operator who builds the systems and automations that let small finance teams scale without scaling headcount.

CORE COMPETENCIES

Technical & Systems: U.S. GAAP • ASC 606 • Multi-Entity Close • Audit Readiness • M&A Diligence & Integration • NetSuite • QuickBooks • Salesforce (Data Architect + 8 certs) • SQL • Tableau • Google AppsScript

AI & Leadership: Built proprietary data integration pipeline syncing 200+ client books into QuickBooks with auto-categorization • Active AI adoption for reconciliation, flux, and recurring reporting • Team management • Cross-functional partnership with Sales, Product, Engineering, Legal, and GTM

PROFESSIONAL EXPERIENCE

Son CPA Corp.

April 2025 – Present

Controller

- Run accounting, reporting, and tax practice for 200+ Bay Area clients across C Corps, S Corps, LLCs, partnerships, and individuals.
- Built a proprietary data integration pipeline syncing client books into QuickBooks via Google Sheets, with auto-categorization and transformation logic that scales the practice without proportional headcount.
- Own GAAP-compliant close and statement prep; manage federal and state tax filings and triage notices directly with the FTB and IRS.

Doorstead

April 2023 – March 2025

Controller

- Owned monthly and quarterly close end-to-end at a high-growth proptech startup, producing GAAP-compliant, audit-ready financial statements.
- Managed four accountants, building team capability through a period of rapid revenue growth and operational complexity.
- Delivered variance and flux analytics to executive leadership; partnered cross-functionally with Sales, Product, Engineering, and GTM to streamline the upstream data discipline that scalable accounting depends on.

Google

May 2022 – April 2023

Assistant Controller, BrightBytes (post-acquisition)

- Owned the systems migration and financial integration of BrightBytes into Google's ecosystem, with no interruption to ASC 606 revenue recognition or close cadence through the transition.
- Google's M&A team noted BrightBytes had presented some of the cleanest books they had reviewed — the result of years of upstream data discipline and audit-ready close process design.

BrightBytes

June 2016 – May 2022

Assistant Controller (Feb 2019 – May 2022)

- Architected and administered the Salesforce CRM as the organization's Salesforce Architect, owning the full data lifecycle from ingestion to reporting; redesign tripled team productivity across the revenue function.
- Owned ASC 606 revenue recognition end-to-end for complex multi-element SaaS enterprise contracts; led technical accounting policy and audit defense.
- Built the core SaaS metrics — ARR, retention, and management reporting — that Sales, CS, Finance, and the board ran off of (Excel, Sheets, Tableau, SQL).
- Partnered with Sales, Product, Legal, and Engineering to optimize quote-to-cash and automate financial data flows, reducing close cycle time and improving accuracy.

Finance Revenue Lead (Oct 2016 – Jan 2019) | Finance Revenue Coordinator (June 2016 – Oct 2016)

- Designed ASC 606 compliance systems for SaaS contracts; rebuilt historical financial statements to GAAP standards, establishing audit readiness that ultimately supported BrightBytes' acquisition by Google for Education.
